I thought I would send this to you if you're not aware of what is going on.

Talk to you in the morning.

Jim

We have been tasked to contact Tammy Gallegos, San Juan County Emergency Management, [435-459-1801](tel:435-459-1801) they have a water provider that we are to subcontract with. Our FCA will contact them. He will find out if they can support your efforts as well once you are tasked.

Ron,

As I'm sure you are aware, R6 verbally tasked us with locating drinking water services and/or Water Trucks for potable water to be located in Farmington. We have not been tasked with mobilizing to Farmington or to actually subcontract with any such services but merely to locate resources & pricing. I have tasked Jim Cromwell (713-408-8524) with doing this, due to his familiarity with this geographical area. Our R6 EPA contact is Jon Rinehart.

Good luck and let us know if we can assist in any way. I will be enroute to Odessa, TX, most of the day tomorrow to start up a site but I'll have my CP with me.

John

EQM was just Notified by FOSC Robert Wise to Mobilize Farmington, NM tomorrow Monday 8/10/2015. The primary Scope of Work will be to support logistics (subcontracting, purchasing), assist with the establishment of support facilities (Joint Incident Command) tentatively set as Region 6 and Region 9 New Mexico geographic response location.

Jason Coury is currently working with Patrick on purchasing airfare to get to Farmington tomorrow. Additionally, lodging and two SUVs to allow independent work tasks.

Jim Cromwell is tentatively mobilizing early next week and potentially accompanied by Gary Reynolds (Portland based Sr. Foreman). Jason and Patrick can support and arrange for Lodging, rental vehicle or whatever is needed to support Jim.

John and Jack, if someone could send Laurie the Rates Disc for Region 6 then Patrick can support the RCMS and Cost Tracking for each contract.

Jack, Should I call Rich and find out what resources we could establish as this could be an excellent way to show local support from the region.

All, I will notify our Team subcontractors to determine what water resources we have available to support the water sampling efforts.

I will update as I gather additional information,

Thanks,

Ron
